Maratha Matrimony Platform

EXECUTIVE QA & MANAGER TESTING MANUAL

End-to-End Platform Testing & User Flows Guide

A complete, step-by-step verification guide covering candidate onboarding, cultural matching, real-time chat sync, printable biodata generation, and the super admin control center.

TARGET AUDIENCE

Project Managers, QA Leads & Stakeholders

RELEASE VERSION

v1.0 Production Ready

CORE MODULES

10 Distinct Systems (Chat, Admin, KYC, Biodata)

TEST READINESS

Pre-Configured & Verified

1. Test Environment & Credentials Matrix

This testing guide enables management and QA to verify all critical customer journeys, edge cases, and administrative functions. The database comes pre-seeded with active matched candidate accounts and an elevated Super Admin account.

 Platform Access URLs

Local Testing URL: http://localhost:3000

Login Portal: http://localhost:3000/login

Admin Direct: http://localhost:3000/admin/dashboard

Pre-Configured Test Accounts

Role / Persona	Login Email	Password	Profile & Attributes	Direct Route
SUPER ADMIN	admin@marathalageen.com	Admin@123	Platform Owner, Moderation, Approvals & Financial Control	/admin/dashboard
GROOM CANDIDATE	demo@maratha.com	Demo@123	Rohit Patil • 28 Yrs • Pune • 96 Kuli Maratha • Software Engineer	/dashboard
BRIDE CANDIDATE	priya.test@maratha.com	Demo@123	Priya Patil • 26 Yrs • Mumbai • 96 Kuli Maratha • HR Professional	/dashboard

 1-Click Login Shortcuts on the Login Screen

The /login page includes built-in quick test buttons right under the password field:

• Click "👤 Super Admin" to automatically populate Super Admin credentials.

• Click "👤 Groom Demo" to automatically populate Rohit Patil's credentials.

• Click "👤 Bride Demo" to automatically populate Priya Patil's credentials.

 Side-by-Side Real-Time Testing Recommendation

To observe live bidirectional messaging, typing indicators, and mutual notifications:

1. Open Window 1 (Normal Chrome): Log in as Rohit Patil (demo@maratha.com).

2. Open Window 2 (Incognito Chrome): Log in as Priya Patil (priya.test@maratha.com).

2. Master Route Map & User Journey Architecture

The platform consists of two distinct ecosystems: the **Candidate Portal** (focused on cultural matchmaking, biodata, and verified communication) and the **Super Admin Console** (focused on moderation, approvals, and metrics).

[Candidate] → /signup → 5-Step /onboarding → /dashboard (Matches) → /interests → /dashboard/chat

[Admin] → /login → (Auto-redirect) → /admin/dashboard → [Users | Approvals | Moderation | Payments]

Master Route Directory

Category	URL Route	Access Level	Core Functionality
Auth	/signup	Public	Account registration (Name, Email, Password, Gender, Profile Creator)
Auth	/login	Public	Secure NextAuth sign-in with 1-click test chips
Onboarding	/onboarding	Candidate Only	5-step cultural profile setup (Devak, Gotra, Kundali, Career)
Discovery	/dashboard	Candidate	Member dashboard, daily recommendations & activity counters
Discovery	/matches	Candidate	Algorithmic partner matching & compatibility scoring
Discovery	/search	Candidate	Advanced multi-attribute search (Sub-caste, Gotra, City, Manglik)
Astrology	/kundali	Candidate	Ashtakoot 36 Guna Milan horoscope calculator
Biodata	/biodata	Candidate	Traditional Maharashtrian printable biodata with PDF/Print layout
Connections	/interests	Candidate	Manage sent, received, accepted, and declined connection requests
Chat	/dashboard/chat	Candidate	Real-time chat with live typing indicator & PostgreSQL persistence
Subscription	/membership	Candidate	Pricing tiers (Free, Premium, Premium Plus) & contact unlocking

Category	URL Route	Access Level	Core Functionality
Admin Core	/admin/dashboard	Super Admin	Executive overview, KPI metrics, active subscribers & pending tasks
Admin Members	/admin/users	Super Admin	User directory, role elevation (<code>USER</code> ↔ <code>ADMIN</code>), ban/activate
Admin KYC	/admin/approvals	Super Admin	Government ID verification queue & trust badge management
Admin Safety	/admin/moderation	Super Admin	Reported abuse tickets, content moderation & image audit
Admin Revenue	/admin/payments	Super Admin	Transaction ledger, active subscriptions & financial tracking
Admin Tools	/admin/broadcast	Super Admin	Push platform-wide announcements to all logged-in members
Admin Export	/admin/export	Super Admin	One-click CSV/Excel export of member dossiers and financial records

3. Step-by-Step Test Scenarios: Candidate Portal

Test Scenario 1: Candidate Registration & 5-Step Cultural Onboarding

FLOW #1

Goal: Verify that a new visitor can register and complete the mandatory 5-step cultural profile setup before gaining access to the dashboard.

- 1 Navigate to `http://localhost:3000/signup`.
- 2 Enter candidate name, unique email (e.g. `test.groom@maratha.com`), password (`Demo@123`), gender (Male/Female), and "Profile Created By" (Self/Parents).
- 3 Submit the form. Observe that the middleware automatically enforces redirection to `/onboarding`.
- 4 **Step 1 (Personal):** Select Marital Status (Never Married), Height (5ft 10in), Weight (72kg), Current City (Pune), State (Maharashtra).
- 5 **Step 2 (Cultural Lineage):** Select Maratha Sub-caste (**96 Kuli Maratha**), Gotra (e.g. **Kashyap**), Devak (**Panchpallav**), Kuldaivat (**Bhavani Tuljapur**), Native Place (Satara).
- 6 **Step 3 (Kundali / पत्रिका):** Select Rashi (Mesh), Nakshatra (Ashwini), Charan (1), Gan (Deva), Manglik Status (Non-Manglik), and Birth Time/Place.
- 7 **Step 4 (Education & Career):** Select Degree (B.E. Computer Science), Profession (Software Engineer), Income Bracket (₹15-20 LPA), Diet (Non-Veg).
- 8 **Step 5 (Family & Photo):** Select Family Type (Nuclear), Father Occupation, Mother Occupation, and upload candidate photo.
- 9 Click "Complete Profile". Verify immediate redirect to `/dashboard` with welcome banner and profile completeness meter updated.

Pass Criteria: All 5 steps validate successfully, user record is populated in PostgreSQL with all lineage/horoscope fields, and user can now browse matches.

Test Scenario 2: Search, Filters & Smart Match Discovery

FLOW #2

Goal: Verify that candidates can find compatible matches using cultural and geographical filters.

- 1 Log in as **Rohit Patil** (`demo@maratha.com` / `Demo@123`).
- 2 Navigate to `/matches` . Verify daily curated matches display with compatibility score badges (e.g. 92% Match).
- 3 Navigate to `/search` . Test the following filters:
 - **Sub-caste:** Select "96 Kuli Maratha".
 - **City:** Filter by "Mumbai" or "Pune".
 - **Manglik Status:** Select "Non-Manglik".
- 4 Verify results reload dynamically. Click on **Priya Patil's** profile card to open the complete candidate dossier at `/profile/[id]` .
- 5 Inspect the candidate dossier tabs: About Me, Kundali & Horoscope, Lineage (Devak, Gotra, Kuldaivat), Family Background, and Lifestyle.

Pass Criteria: Profile displays all cultural fields accurately and respects photo privacy settings.

Test Scenario 3: Traditional Printable Biodata Generator

FLOW #3

Goal: Validate the creation, preview, and printing of a traditional Maharashtrian Biodata.

- 1 While logged in as Rohit or Priya, navigate to `http://localhost:3000/biodata` .
- 2 Verify the traditional layout renders:
 - Header with **श्री गणेशाय नमः** and auspicious emblem.
 - Candidate photo with royal border frame.
 - **वैयक्तिक माहिती (Personal Info):** Full Name, DOB, Time, Place, Height, Blood Group.
 - **कुल व देवक माहिती (Lineage):** जात (Maratha), उपजात (96 Kuli), गोत्र (Kashyap), देवक (Panchpallav), कुलदैवत (Bhavani Tuljapur), मूळ गाव.
 - **पत्रिका / कुंडली (Horoscope):** रास, नक्षत्र, चरण, गण, नाडी, मंगळ.
 - **कौटुंबिक माहिती (Family):** Father/Mother details, Siblings, Mama Gotra, Relatives.
- 3 Click the **"Print / Save as PDF"** button. Verify print preview opens cleanly without web navigation artifacts or sidebar interference.

Pass Criteria: Formatted cleanly for single/two-page A4 printing with zero CSS overflow or clipping.

4. Real-Time Chat & Bidirectional Sync Testing

The chat engine has been upgraded to a production-grade, 100% database-backed engine. All simulated client-side mock timers and auto-replies have been removed. Messages and typing indicators sync bidirectionally in real time.

Test Scenario 4: Live Chat & Real-Time Bidirectional Typing Indicator

FLOW #4

Goal: Validate simultaneous real-time communication between two active members across independent sessions.

Required Setup:

- **Window 1 (Regular Browser):** Log in as **Rohit Patil** (demo@maratha.com / Demo@123).
- **Window 2 (Incognito Window):** Log in as **Priya Patil** (priya.test@maratha.com / Demo@123).

- 1 In both windows, navigate to `http://localhost:3000/dashboard/chat`.
- 2 In **Window 1 (Rohit)**, click on **Priya Patil** in the active conversations sidebar.
- 3 In **Window 2 (Priya)**, click on **Rohit Patil** in the active conversations sidebar.
- 4 **Test Typing Indicator (Rohit → Priya):**
In Window 1, begin typing a message in the input box (do not press send yet).
Look at **Window 2 (Priya's screen)**:
 - The header immediately displays a pulsing status: **"Rohit is typing..."**.
 - An animated 3-dot message bubble appears at the bottom of the message thread.Clear the input in Window 1 — verify that the indicator disappears in Window 2 within 2 seconds.
- 5 **Test Live Message Delivery (Rohit → Priya):**
In Window 1, send: *"Namaskar Priya, had a chance to look at your biodata. Would love to discuss further."*
Observe Window 2: Within 1.5 seconds, the new message renders on Priya's screen on the left in clean white bubble style with timestamp.
- 6 **Test Reverse Live Reply (Priya → Rohit):**
In Window 2 (Priya), type and send: *"Namaskar Rohit! Yes, our families' Devak and Gotra align well. Let's arrange a call."*
Observe Window 1 (Rohit): Message appears instantly.
- 7 **Verify No Fake Auto-Replies:**
Notice that neither side triggers simulated bot replies or pre-canned dummy timers. Every message is authentic and directly committed to the PostgreSQL `Message` table.
- 8 **Verify Responsive UI Layout:**
Resize the browser window to compact laptop sizes (e.g. 1024×665).
Verify that the input box, send button, and chat messages stay 100% visible inside the viewport without page truncation or horizontal clipping.

Pass Criteria:

- ✓ Messages persist across page refreshes (stored in PostgreSQL).
- ✓ Typing indicator works bidirectionally with automatic timeout.
- ✓ No horizontal or vertical clipping on compact viewports.
- ✓ Clean Maratha Matrimony crimson/pink brand styling (#DB1866).

Test Scenario 5: Membership Plans & Contact Unlocking

FLOW #5

Goal: Verify monetization gates and premium phone number unlocking.

- 1 Navigate to `/membership` .
- 2 Compare features across **Free**, **Premium (₹2,499)**, and **Premium Plus (₹4,999)** tiers.
- 3 Click "Upgrade" on the Premium tier to enter the checkout flow at `/payment` .
- 4 Verify that upon activation, candidate profiles show unblurred contact numbers and direct WhatsApp connect buttons.

5. Step-by-Step Test Scenarios: Super Admin Console

The Super Admin console provides complete operational control over member accounts, content moderation, KYC verification, revenue tracking, and global broadcasts.

Test Scenario 6: Super Admin Login & Executive Dashboard Overview

ADMIN FLOW #1

Goal: Verify secure administrative access, role enforcement, and platform metrics.

- 1 Navigate to `http://localhost:3000/login` .
- 2 Click the quick test chip " **Super Admin**" (fills `admin@marathalageen.com` / `Admin@123`).
- 3 Click "Sign In". Verify the system validates the `ADMIN` role and automatically routes to `/admin/dashboard` .
- 4 **Inspect KPI Cards:**
 - **Total Registered Profiles:** Total bride and groom count.
 - **Active Subscriptions:** Members on paid tiers.
 - **Pending Verifications:** Accounts awaiting document approval.
 - **Monthly Revenue:** Total transaction volume.
- 5 **Test Security Guard:** Attempt to visit `/admin/dashboard` while logged in as Rohit Patil. Verify that the middleware redirects non-admin users to `/dashboard` .

Pass Criteria: Only authenticated users with `role: "ADMIN"` can access any `/admin/*` routes.

Test Scenario 7: User Management & Role Elevation

ADMIN FLOW #2

Goal: Verify search, inspection, role modification, and account status management.

- 1 From the admin sidebar, click "**Users**" (`/admin/users`).
- 2 Use the search bar to search by name ("Priya") or email ("priya.test@maratha.com").
- 3 Test the filter tabs: **All Members**, **Verified Only**, **Pending Verification**, and **Admin Accounts**.
- 4 Click on a member row to inspect their full profile, subscription status, and join date.
- 5 Verify action buttons: Toggle Role (`USER` ↔ `ADMIN`), Deactivate Account, or Delete Profile.

Test Scenario 8: Approvals & Government ID Verification Queue

ADMIN FLOW #3

Goal: Verify KYC document review and trust badge assignment.

- 1 Click **"Verification"** (`/admin/approvals`).
- 2 Review the list of candidates who submitted Aadhaar, PAN, or employment credentials.
- 3 Click **"Approve"** on a pending profile.
- 4 Verify in the database and public profile view that `isVerified` updates to `true` , displaying the green shield trust badge.

Test Scenario 9: Global Broadcasts & Data Export

ADMIN FLOW #4

Goal: Validate system announcements and analytical reports export.

- 1 Navigate to **"Broadcast"** (`/admin/broadcast`).
- 2 Create a new announcement: Title *"Pune Vadhu-Var Melawa Announced!"*, Message, Banner Type (Info/Warning/Urgent).
- 3 Publish the broadcast. Verify that logged-in candidates see the alert notification on their dashboard banner.
- 4 Navigate to **"Export"** (`/admin/export`).
- 5 Click **"Export Member Directory (CSV)"** and **"Export Financial Ledger"**. Verify CSV files download cleanly with full column headers.

6. QA Acceptance Testing Sign-Off Checklist

Your QA tester or manager can print or fill this checklist to record pass/fail verification for each platform feature:

ID	Module / Feature	Expected Behavior	Status	Sign-off
QA-01	Candidate Registration	Account created, redirected to 5-step onboarding wizard.	☐ Pass ☐ Fail	_____
QA-02	Cultural Onboarding	Saves Devak, Gotra, Kuldaivat, and Kundali attributes to PostgreSQL.	☐ Pass ☐ Fail	_____
QA-03	Smart Matchmaking	Accurate compatibility scoring based on partner preferences.	☐ Pass ☐ Fail	_____
QA-04	Printable Biodata	Traditional Maharashtrian layout with Ganesha header & print preview.	☐ Pass ☐ Fail	_____
QA-05	Real-Time Chat Sync	Instant 1.5s bidirectional delivery without simulated mock bot replies.	☐ Pass ☐ Fail	_____
QA-06	Typing Indicator	Displays "typing..." status and animated 3 dots in real time.	☐ Pass ☐ Fail	_____
QA-07	Chat UI Layout	No clipping or horizontal truncation on 1024×665 viewports.	☐ Pass ☐ Fail	_____
QA-08	Brand Color Styling	Clean crimson/pink brand palette (#DB1866) applied consistently.	☐ Pass ☐ Fail	_____
QA-09	Super Admin Login	1-click chip fills credentials, routes automatically to /admin/dashboard .	☐ Pass ☐ Fail	_____
QA-10	Route Protection	Non-admin candidates blocked from visiting /admin/* routes.	☐ Pass ☐ Fail	_____
QA-11	User Administration	Admin can search, inspect, ban, and modify candidate roles.	☐ Pass ☐ Fail	_____
QA-12	KYC Approvals	Admin can approve documents and toggle green verified badges.	☐ Pass ☐ Fail	_____
QA-13	Data Export	Member directory and transaction records export cleanly to CSV.	☐ Pass ☐ Fail	_____
